simplifying payments

EnterpriseSecure

What is EnterpriseSecure?

EnterpriseSecure is a multi-channel payments solution designed with the enterprise in mind. By placing ease of integration, customisation capability and diverse connectivity in the palm of your hand, EnterpriseSecure allows you to securely align your payment options with your customer experience.

Why choose EnterpriseSecure?

A complex payments environment is no longer a barrier to building a highly secure and flexible customer-centric payments capability. EnterpriseSecure's diverse range of highly customisable integration options minimises the typical re-engineering required to change technologies. This ease of integration coupled with EnterpriseSecure's multi-bank connectivity enables seamless switching of financial institutions and puts you back in control of your payments strategy.

Key benefits

- Flexible integration options
- Avoid lock-in to acquiring banks
- Enhanced customer experience and security
- Reduced payment security and PCI DSS compliance costs
- Access and ownership of your data at all times
- Omnichannel and multichannel service capability

- Multi bank connectivity and strategic bank independence
- Stay in control of transaction and bank costs
- Level 1 PCI DSS security compliant
- Reduction in project costs and lead times associated with changing banks
- Detailed reporting and graphical functionality.

Simplified integration

- Easy integration with existing gateways and complex payments environments
- Reduce risk and take control of your payments using our multi-bank platform
- Proxy integration options available for more complex requirements.
